

TOTE WASHER

MATERIALS:

- Stainless Steel

POWER SUPPLY:

- 220V-600V / 3pH / 60Hz + PE

GENERAL DESCRIPTION

The **Tote Washer** is a compact, high-efficiency unit specifically designed to sanitize harvest totes.

Typically positioned immediately after the tipping stage, it uses **high-velocity spray jets to strip away debris and residues.**

By automating the washing process, it ensures that every container returning to the field or storage is clean, supporting a sterile supply chain and protecting the quality of future harvests

Speed: Up to 20 boxes per minute.

KEY BENEFITS

- **Enhanced Hygiene:** Effectively removes debris and bacteria from complex crate geometries.
- **Seamless Integration:** Ideal for installation directly following box tippers to maintain a continuous, automated flow.
- **Operational Reliability:** Designed for low maintenance and 24/7 operation in humid packing environments.

SPECIFICATIONS

- Corrosion-resistant stainless steel frame and housing.
- Adjustable spray nozzles to accommodate various tote sizes and shapes.
- Self-cleaning filtration system to remove solids during the wash cycle.
- Variable speed control to match the throughput of the main production line.
